ABOUT US

Global Green EnviroSystems (GGE)

is a young startup organization dedicated to advancing sustainable development and offering cutting-edge environmental solutions. With a primary focus on solid waste management and wastewater treatment, GGE collaborates with a wide range of stakeholders through policy advocacy, consultancy, capacity building, and service delivery.

Additionally, we help design and supply advanced attached growth biological systems and high rate settling systems for the wastewater treatment industry, working closely with original equipment manufacturers (OEMs) and other consultants to create highly efficient, eco-friendly treatment solutions.

Headquartered in city of Aligarh, Uttar Pradesh (125 Kms from National Capital) our mission is to promote solutions for sustainable development.

Our team brings a wealth of experience in research, consulting, and education, spearheaded by our co-founder, Mr. Sourabh Manuja, Our Director Ms. Shweta Anand and Dr. Shiv Kumar Dube.

WHAT WE DO

Stakeholder Capacity Building

Training and Workshop, Knowledge Sharing Platforms, Collaboration with NGOs and Government.

Digitalisation

Technology solutions for integration and performance.

Use of digital tools to track, monitor, and manage waste,

Water and Wastewater Treatment

We provide sustainable wastewater solution, supply attached growth and high rate settling media

Circular Economy and Waste Management

We drive 3R based solutions to transform waste into resources, promote cleaner production and advanced garbage free, sustainable cities.

Audits for Sustainable Development

We conduct resource audits to help policymakers and industry minimize environmental impact and ensure regulatory compliance.
